Rev. 1.0

## I. Download Windows Wallet / Mac / Linux

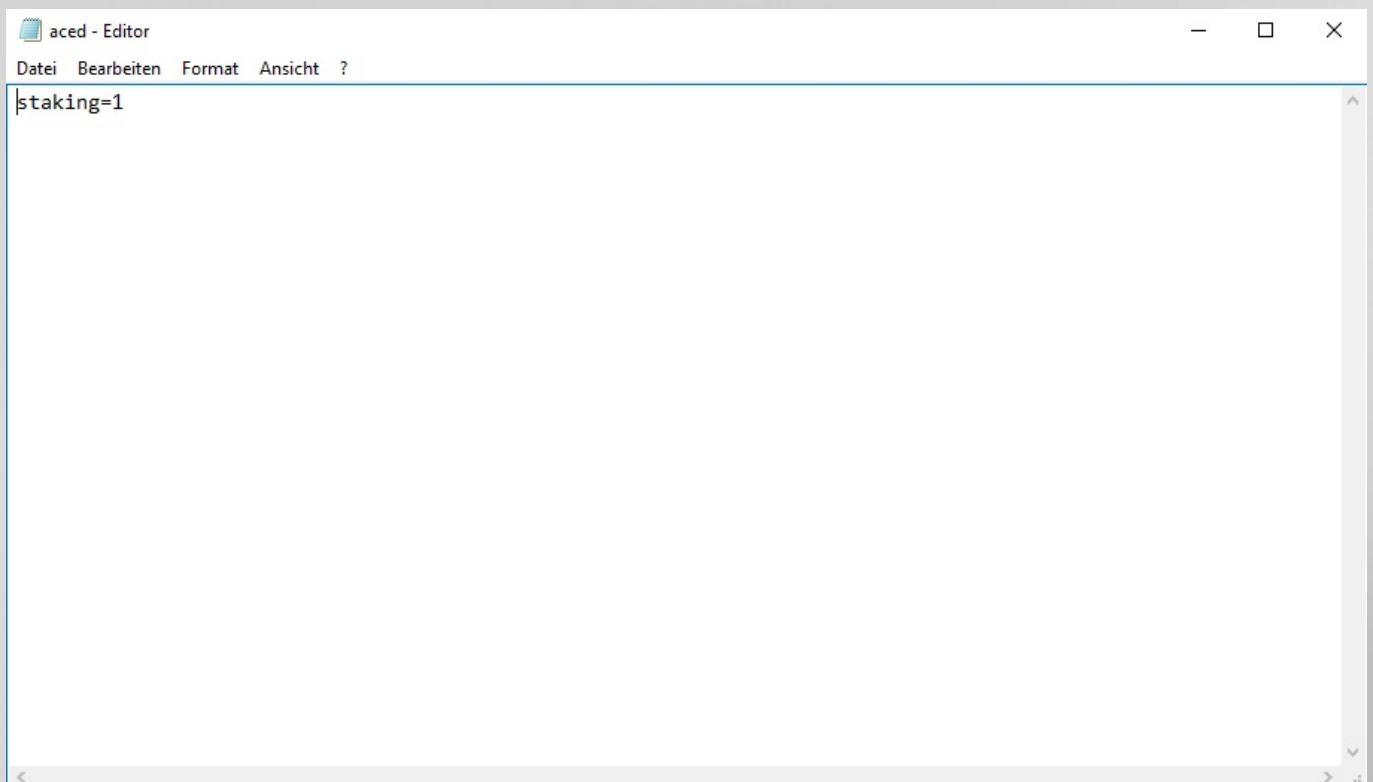

- 1) Download our latest Wallet from <https://acedcoin.com/#wallets> and run the QT wallet

## II. Prepare your Wallet for staking

1. Open the Wallet configuration file

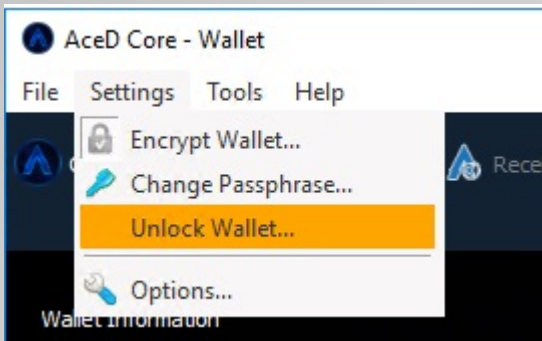

2. Add "staking=1" (without ") and save the configuration

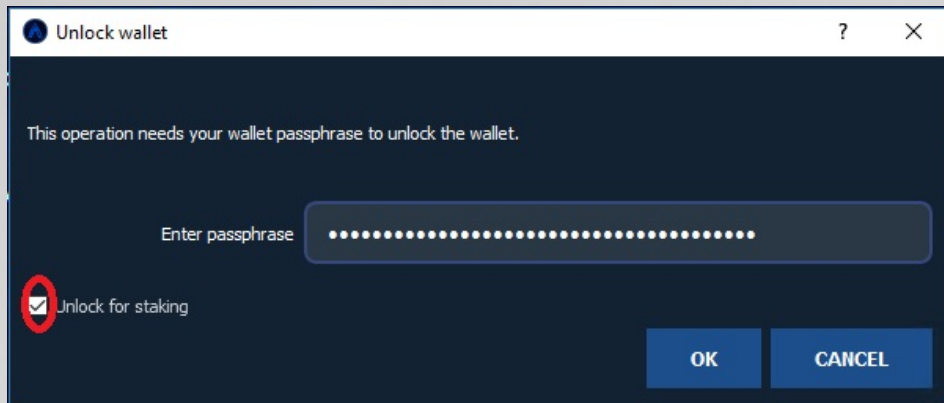

### III. Restart your Wallet

### IV. Start staking AceD

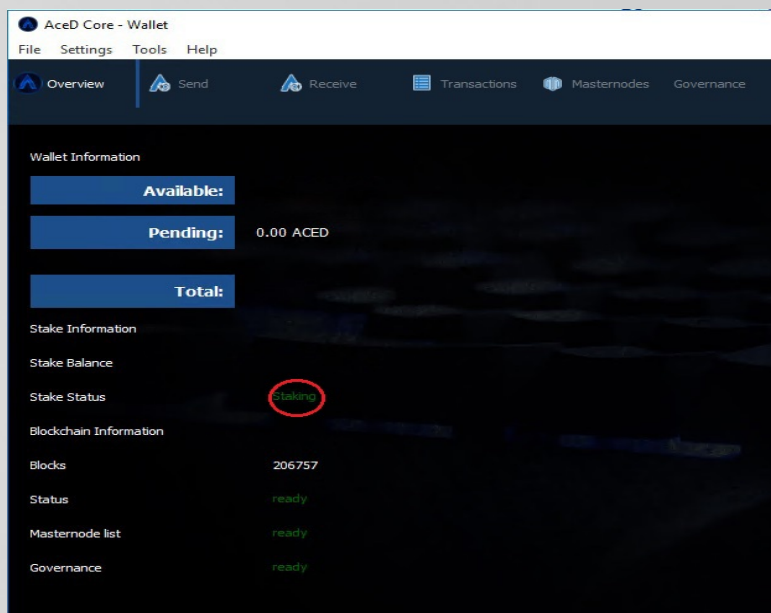

1. Unlock your wallet for staking

2. Enter your password (your wallet needs to be encrypted before)

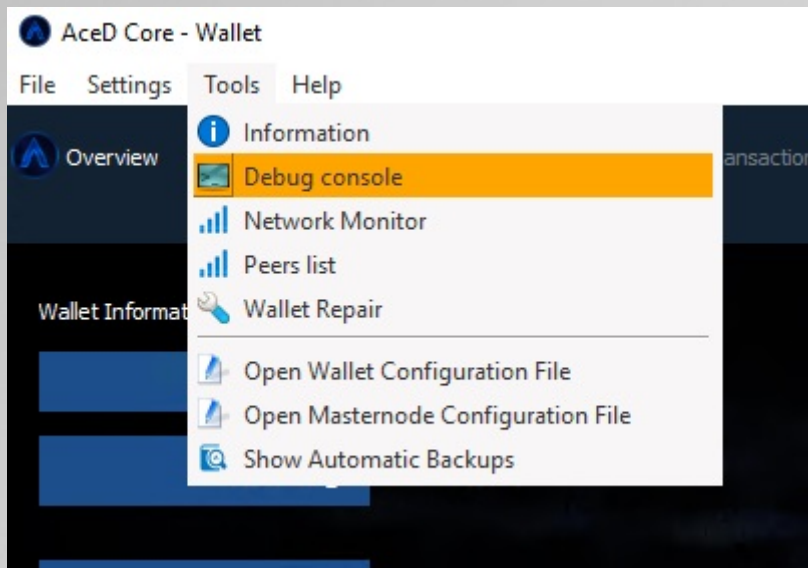

3. Your "Staking status" should change in a few minutes

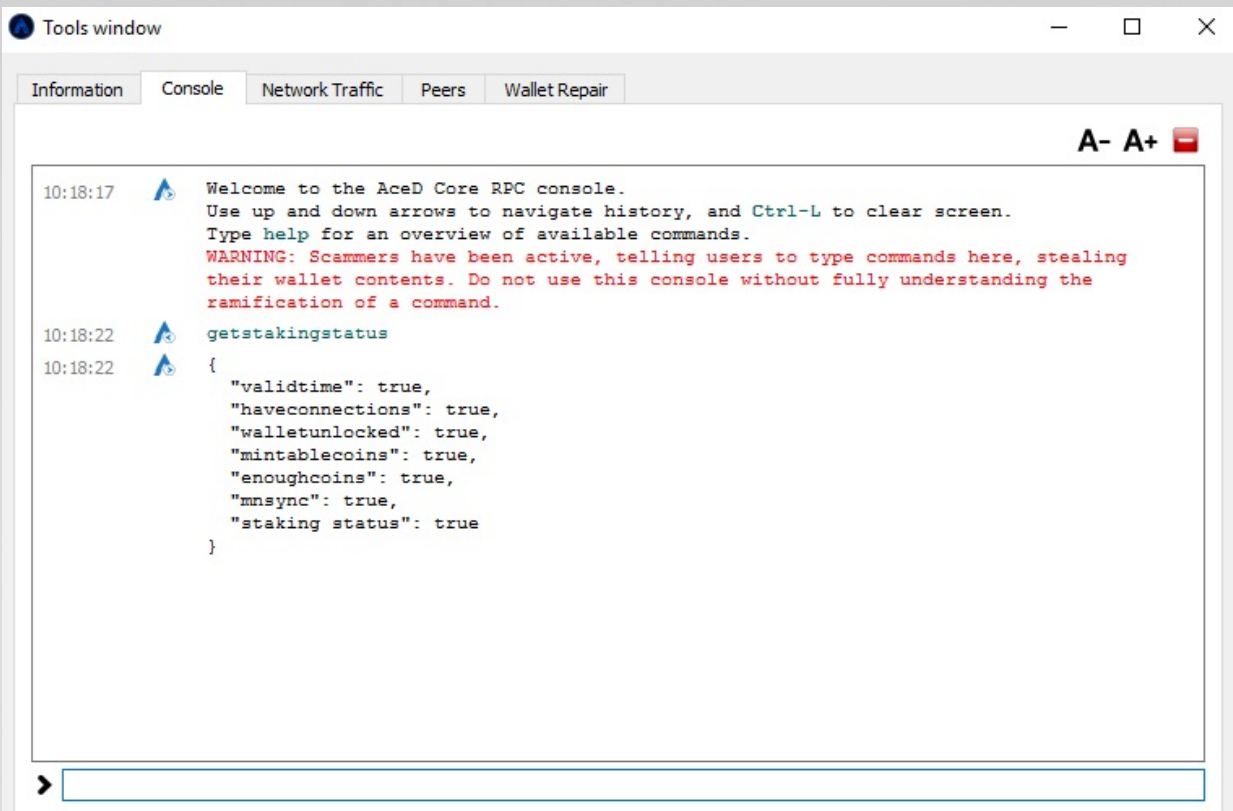

## V. Final staking check

1. Go to the debug console

2. Type "getstakingstatus" and check the outcome. If everything is true, you are good

**\*\*IMPORTANT\*\*** Your coins need to be at least 2 hours in your wallet to be matured!

**Your wallet needs to be online 24/7 for staking!**
